

REGION ÖREBRO COUNTY – YOU PARTNER IN SWEDEN

The overall task of Region Örebro county is to gather the county’s resources in regional politics into an effective, democratically controlled organization. The purpose and task of the organization is to improve conditions for sustainable growth and to contribute to the best possible quality of life throughout the whole of Örebro County. The Council is in frequent contact/close collaboration with the different regional actors, and therefore in a key position when it comes to connecting international partners with regional expertise.

Örebro County – The Heart of Sweden

In Örebro County (290 000 inhabitants) you can find many interesting enterprises, much knowledge and an impressive infrastructure in form of good educations, University hospital with advanced health care and research, good communications within an attractive geographical and demographical area, unique home environments that provides quality of life and offers a spectacular nature.

In Örebro County there is the by far biggest marshalling yard in Scandinavia and a TEN-T Core Rail Road Terminal. You can call it “The Heart of Scandinavian Rail Transports”. It is also the Swedish region where over the last years the most new distribution centers with more than 10 000 sqm were established. In the 2014’s ranking for Best Logistics Location in Sweden the region is on 2nd place. This is partly due to the excellent infrastructure system around, the location right in the middle of the triangle Stockholm-Gothenburg-Oslo and Sweden’s 4th biggest airport for freight. The demographic center of Sweden is located in the region and many companies choose to place their distribution centers for Scandinavia here.

Örebro Regional Energy Agency – your partner in energy and climate in Central Sweden

Örebro Region Energy Agency is running a wide range of projects on energy and sustainability. Great emphasis is generally placed on information, education and the support of new networks. Some projects are pure inquiry commissions. Most of the funding comes from the Swedish Energy Agency, the Örebro Regional Development Council and the Swedish Environmental Protection Agency.

EUROPEAN PROJECTS PORTFOLIO

INTERESTS IN HORIZON 2020

THEME 1 – Transport

Smart, green and integrated transport challenge

MG.3.5-2014. Cooperative ITS for safe, congestion-free and sustainable mobility

MG.5.4-2015. Strengthening the knowledge and capacities of local authorities

MG.5.5-2015. Demonstrating and testing innovative solutions for cleaner and better urban transport and mobility

MG.6.3-2015. Common communication and navigation platforms for pan-European logistics applications

MG.8.1-2014. Smarter design, construction and maintenance

MG.8.2-2014. Next generation transport infrastructure: resource efficient, smarter and safer

MG 8.3-2015 Facilitating market take up of innovative transport infrastructure solutions

MG.8.4-2015. Smart governance, network resilience and streamlined delivery of infrastructure innovation

MG.9.1-2015. Transport societal drivers

THEME 2 – Energy

Secure, clean and efficient energy

EE4. Construction skills

EE 5. Increasing energy performance of existing buildings through process and organization innovations and creating a market for deep renovation

EE 7. Enhancing the capacity of public authorities to plan and implement sustainable energy policies

EE 9. Empowering stakeholders to assist public authorities in the definition and implementation of sustainable energy policies and measures

EE 10. Consumer engagement for sust energy

EE 16. Organisational innovation to increase EE in industry

EE 20. Project development assistance for innovative bankable and aggregated sustainable energy investments schemes and projects

LCE 4. Market uptake of existing and emerging renewable electricity, heating and cooling technologies

LCE 14. Market uptake of existing and emerging sustainable bioenergy
